

Visit by Niigata University Students

A group of students from Niigata University, Japan, visited CLS on the 9th March 2009 and participated in the interview project of LAJ2203 Japanese 4.

The students exchanged opinions about various issues in foreign language education in their home countries, including problems and possible solutions. They also shared their experiences in foreign language learning. This opportunity encouraged students to do self-reflection, as well as to broaden their views on how they learn foreign languages.
